

Prosave

Display protection films

**KIMOTO**

ProSave is a removable protection film developed to preserve the appearance and performance of indoor displays and touch panels.

Its durable hard-coated surface resists scratches and fingerprints, while the removable silicone adhesive allows for easy installation and clean replacement.

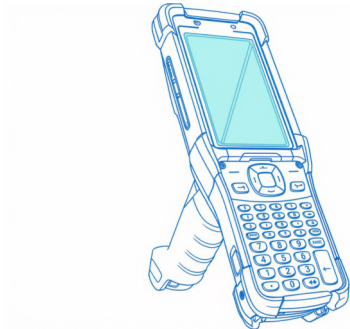

Perfect for POS systems, self-service kiosks, vehicle HMI, ticketing machines, digital directories, industrial displays and other interactive display applications.

Product features

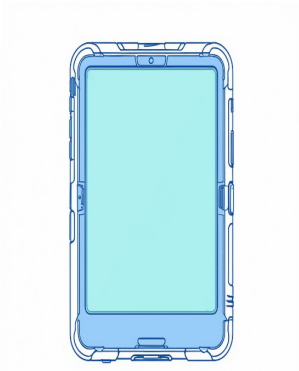

- Scratch and Chemical resistant hard-coated surface for enhanced durability
- Excellent optical clarity for high-quality display performance
- Easy to clean Anti-fingerprint coating for a clean display surface
- Anti-glare surface options for improved visibility under all lighting conditions
- Removable self-wet silicone adhesive
- Residue-free removal
- Easy installation and field replacement
