Prosave

Protection for Outdoor Displays

ProSave is a removable protection film specifically developed for outdoor displays. It offers durable protection against scratches, dirt, vandalism, and weather-related damage.

The Antiglare surface guarantees excellent display visibility in full daylight by reducing reflections from the surrounding environment.

Ideal for applications such as: EV charging stations, digital signage, ticket vending and public kiosk systems.

Product features

UV protection:

Protects the display from UV radiation to prolong its lifetime

Excellent visibility, image quality and touch operation:

Ensures clear visibility of display in full daylight due to Antiglare surface, optimized for smooth touch operation and includes anti-fingerprint properties

Durable Scratch Protection:

The hard coated surface not only prevents wear from daily touch operation but also protects from intentional damage such as vandalism and graffiti

Removable & Replaceable:

Easy to install and replace in the field.

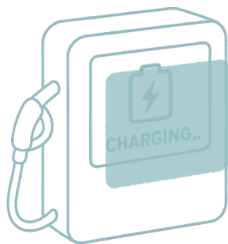

Bubble free application due to high performance silicone adhesive

Residue-Free Removal:

Comes off cleanly without leaving adhesive on the display surface
